

**Project:** The Hastings Academy

**Date:** August 2011 - Ongoing

**Programme:** Phase 1 – 10 Weeks - Phase 2 – 8 Weeks 2013

**Overview:** To remove the Asbestos containing materials under semi, and fully controlled conditions then demolish Hillcrest School, Rye Road, Hastings. Phase 1 is to be completed, then the New Hastings Academy will be built on the site. Once completed, the remaining part of the school will be demolished. This is due to be completed in February 2013.

#### Staff Accreditations for Works:

Site Management staff hold CITB “Site Supervisor Safety Plus Training”

Staff involved in strip out works hold CSCS accreditation.

Staff involved with demolition all hold CCDO accreditation.

Plant operators hold CPCS training where necessary.

Asbestos Removal was carried out under our own 3 year asbestos licence.

All staff involved held ARCA Operative as standard with Site management

holding ARCA Supervisors & ARCA Licensed Contract Manager.

MEWP operators have either IPAF or CPCS endorsed with the correct category.

Staff Erecting Towers are all PASMA trained.

#### Complexity of Works:

We carried out the cuts to the existing school in phase 1. This enabled the rest of the school (Phase 2) to be operational whilst their new building is being constructed. This means that demolition is taking place in very close proximity to school children and classrooms. Noise and dust are major factors in our demolition methods.
